2nd Nordic Symposium in Paediatric Proton Radiotherapy

April 6-7 2016

**Hotel Nyborg Strand
Nyborg, Denmark**

Dear Colleagues,

On behalf of the Danish Center for Particle Therapy, we would like to cordially invite you to this meeting about paediatric proton radiotherapy.

The purpose is to share knowledge about proton radiotherapy for children in a Nordic, multi- and interdisciplinary perspective and to develop new ideas about Nordic collaborations in paediatric proton radiotherapy.

This meeting addresses radiation oncologists, paediatric oncologists, surgeons, medical physicists, radiation therapists, paediatric nurses and all others with interest in the field.

A broad range of topics will be presented by Nordic and international experts in the fields.

For more information and registration please see

NordicProtonKids2016.dk

Morten Høyer and Yasmin Lassen
For the organisation committee

Topics:

- Current Status of particle therapy in the Nordic countries
- Education of staff for paediatric proton radiotherapy
- Particle therapy for paediatric sarcoma
- Follow up and registration of morbidity
- Proton radiotherapy of paediatric brain tumours
- Brain morbidity after proton radiotherapy, effect of age and additional therapies
- Factors affecting robustness in proton radiotherapy
- Pitfalls in proton-photon doseplan comparisons
- Clinical experience of growth inhibition after childhood radiotherapy
- Growth inhibition-implication for proton radiotherapy

The meeting is kindly funded by:

- Danish Cancer Society
- Swedish Childhood Cancer Foundation
